Designers, including but not limited to, Engineers and Architects, must satisfy themselves in respect of the adequacy of the design provided by Alumasc Water Management Solutions ("Alumasc"). It is the Designer's responsibility to ensure that the data has been correctly interpreted. Alumasc accepts no liability for inadequate or inaccurate designs based on limited or false information supplied by the Designer or misinterpretation of the data supplied. For the avoidance of doubt, designs provided by Alumasc prior to an order being placed are for illustrative purposes only and should not be relied upon save for at the Designer's own risk. Drawings issued by Alumasc in respect of an order after that order has been placed shall be fit for the purpose for which it was created.

Designers, including but not limited to, Engineers and Architects, must satisfy themselves in respect of the adequacy of the design provided by Alumasc Water Management Solutions ("Alumasc"). It is the Designer's responsibility to ensure that the data has been correctly interpreted. Alumasc accepts no liability for inadequate or inaccurate designs based on limited or false information supplied by the Designer or misinterpretation of the data supplied. For the avoidance of doubt, designs provided by Alumasc prior to an order being placed are for illustrative purposes only and should not be relied upon save for at the Designer's own risk. Drawings issued by Alumasc in respect of an order after that order has been placed shall be fit for the purpose for which it was created.
